

Femmenessence

A Revolutionary Approach to Natural Menopause Support

For many years aging women have faced an urgent need for more and better options in the management of menopausal symptoms as well as more complete support for heart, bone and mental health. Concerns over safety¹⁻³ have had women looking for effective natural alternatives. In a major scientific advance, a 100% natural form of support is now available that helps menopausal women in an entirely new way.

Femmenessence, with its unique mode of action, supports the body's own production of hormones without introducing any hormones into the body... and nothing is more natural than your own hormones.^{7,8}

Femmenessence contains a highly concentrated and bioavailable proprietary combination of phenotypes of organically certified maca root (*Lepidium peruvianum*) specifically blended for menopausal women. Research demonstrates that there are in fact many different maca phenotypes, each with different effects on the body, requiring specific blends for each biological stage of a woman's life.

In published clinical trials, **Femmenessence** was shown to provide statistically significant support in 21 days, for 84% of women experiencing menopausal symptoms.* **Femmenessence** supports energy, sexual experience, brain health and reduces stress.* But even more importantly, **Femmenessence** also supports heart and bone health.*^{4-7,9}

The result is cutting-edge products for peri and post menopausal women that are safe, effective, 100% natural, supported by published clinical trials and recommended by some of the top integrative practitioners in women's health.

- ✓ Better mood*
- ✓ More energy*
- ✓ Healthy body weight*
- ✓ Fewer hot flashes & night sweats*
- ✓ Enhanced sexual experience*
- ✓ Healthy hormone metabolism*
